

AIM:

To learn about how to create epics, user story, features, backlogs for your assigned project.

STEPS:

1.

The screenshot shows the Azure DevOps interface for a project named 'QuantStockAnalyzer'. The left sidebar contains navigation options: Overview, Boards, Work items (selected), Backlogs, Sprints, Queries, Delivery Plans, Pipelines, and Artifacts. The main area displays a 'Recently updated' list with a feature work item titled '29 User Controls' by 'R D Rakshitha'. The work item details are shown in a tabbed view with 'Details' selected. The 'Details' tab includes sections for Description, Planning, Deployment, and Development. The 'Description' section is currently empty, with a placeholder text 'Click to add Description.' The 'Planning' section shows fields for Priority (2), Risk, Effort, Business Value, Time Criticality, Start Date, and Target Date. The 'Deployment' section contains instructions on how to track releases associated with the work item. The 'Development' section includes an 'Add link' option to link an Azure Repos commit, pull request, or branch to the work item.

2.

The screenshot shows the Azure DevOps interface for a project named 'QuantStockAnalyzer'. The left sidebar contains navigation options: Overview, Boards, Work items (selected), Backlogs, Sprints, Queries, Delivery Plans, Pipelines, and Artifacts. The main area displays a 'Recently updated' list with a user story work item titled '51 Refresh analysis' by 'Varneka K'. The work item details are shown in a tabbed view with 'Details' selected. The 'Details' tab includes sections for Description, Planning, Deployment, and Development. The 'Description' section contains the text 'As a user, I want to refresh stock data so that I can get the most up-to-date analysis results.' The 'Acceptance Criteria' section is currently empty, with a placeholder text 'Click to add Acceptance Criteria.' The 'Planning' section shows fields for Story Points, Priority (2), Risk, and Classification. The 'Deployment' section contains instructions on how to track releases associated with the work item. The 'Development' section includes an 'Add link' option to link an Azure Repos commit, pull request, or branch to the work item. The 'Related Work' section shows a link to the parent work item '29 User Controls'.

3.

The screenshot displays the Azure DevOps web interface for a project named 'QuantStockAnalyzer'. The left sidebar contains navigation links for Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Pipelines, and Artifacts. The main content area shows a 'Recently updated' view of a task titled '81 Clean codebase' by user 'R D Rakshitha'. The task is in the 'New' state and is associated with the 'QuantStockAnalyzer' area and iteration. The task description is 'Remove unused code and improve readability.' The right sidebar provides details for the task, including a 'Planning' section with a priority of 2, an 'Effort (Hours)' section with an original estimate, and a 'Deployment' section with instructions on how to track releases and deployment status reporting. The 'Implementation' section is also visible at the bottom.

RESULTS:

Thus the creation of epics, features, user story and task has been created successfully
